

OHM-UPS

CUSTOMIZED UPS SOLUTIONS

SYSTEM DESCRIPTION

Our modular UPS systems as well as rectifier, inverter, and DC/DC systems provide maximum flexibility and highest availability for critical applications.

Thanks to their scalable design, performance and redundancy can be precisely adapted to your individual requirements.

Whether for small IT environments or complex industrial plants – we deliver the right solution.

PLANNING - INSTALLATION - COMMISSIONING - MAINTENANCE ALL FROM A SINGLE SOURCE

From initial consultation to ongoing support, we accompany you throughout the entire life cycle of your UPS system. Our services include:

- **Planning:** Needs assessment and system design
- **Installation:** Professional installation and integration
- **Commissioning:** Functional testing and acceptance
- **Maintenance:** Regular inspections and fast service

One contact person - full control - maximum security.

FIELDS OF APPLICATION

Our systems are used wherever power failures are not an option and flexible output voltages are required.

Thanks to our manufacturer-independent approach, we implement a wide range of voltage levels and seamlessly integrate existing equipment into your infrastructure.

- ☑ Energy utilities & infrastructure
- ☑ Computing & data centers
- ☑ Medical facilities & medically used areas
- ☑ Industry
- ☑ Defense and disaster protection
